### **SERAPID INTRODUCES NON-MAGNETIC RIGID CHAIN**

(April 2, 2007) Serapid, Inc., a leader in mechanical lifts and Rigid Chain Technology will introduce a new, non-magnetic chain at the PharmaMedDevice Show April 24<sup>th</sup> through 26<sup>th</sup>.

The RigiBelt is made of reinforced plastic and stainless steel. The chain comes together much like a zipper to form a column. It moves quickly and quietly while telescoping in and out, and is stored in a compact magazine.

Serapid's new actuator can be used for any kind of positioning in medical equipment. It is especially suited where non-magnetic components are a must.

All of Serapid's Linear Telescopic Actuators are entirely mechanical, which allow them to be environmentally friendly and suitable for clean-room conditions. Each system has a simple configuration, is custom designed and includes a space-saving chain return storage.

For more information about Serapid, visit them on the web at [www.serapid.com](http://www.serapid.com), call 586-274-0774, e-mail them at [info-us@serapid.com](mailto:info-us@serapid.com) or stop by booth #127 at the PharmaMedDevice Show!
